Everyday thousands of Citrix customers rely on award winning Citrix products to run their businesses. However, superior product alone is not sufficient for success – the know-how of the staff implementing and managing the software is critical to ensuring it continues to work at peak performance.

To ensure this know-how can be acquired in a location near you Citrix has created a network of high quality training providers called Citrix Authorized Learning Centers (CALCs). Only CALCs can deliver official Citrix courses using Citrix Certified Instructors (CCIs) at the quality standard set and certified by Citrix. Through their close relationship with Citrix CALCs are able to provide the complete knowledge and expertise to ensure the efficient implementation and administration of Citrix installations.

Acquiring knowledge is step one to making sure the right skills are in place in your organisation. Only by testing this knowledge through a rigorous certification process can you ensure that the expertise is secured. Citrix certifications are industry recognised qualifications which provide excellent credentials that can be used to demonstrate expertise.

Only CALCs can prepare students to successfully complete Citrix certification programs using their Citrix approved training facilities and instructors, in conjunction with, official Citrix training materials.
